Life Solutions

Solutions that make life easier...

Panasonic Life Solutions Turkey operates in its industrial facilities in Istanbul and aims to deliver innovative products and solutions that provide comfort, security and energy efficiency to the world markets and to provide a better and more comfortable life with human-focused approaches. Together with the investment carried out in 2014, Panasonic Life Solutions Turkey, holding VIKO also, the leading brand in the sector with Super Brand status represents successfully its brands in the world markets by exporting to more than 60 countries and continues its leadership in Turkey.

Panasonic Life Solutions Turkey having industrial facilities that implemented all integrations required by technological transformation carries out R & D, innovation and design studies successfully to produce products and solutions to improve the quality of living spaces of users and to offer innovative products to the market.

In the product range of Panasonic Life Solutions Turkey; there is Electric Switches and Sockets, Group Sockets, Accessories, Low-Voltage Switchgear Products, Fuse Boxes, Electronic Electricity Meters, Automated Meter Reading Systems, Smart House and Building Automation Systems, LED Lighting Products, Professional Hand Tools, Solar Energy Panels, Video Surveillance Systems and Fire Detection Systems.

Panasonic Life Solutions Turkey, addressing sustainability through corporate approaches and carrying out social responsibility projects that add value to the future has also ISO 9001, ISO 14001, OHSAS 18001 and ISO 27001 Information Security Systems as a result of its approach to quality, safety and environmental responsibility.

Panasonic Life Solutions Turkey will continue to offer products and solutions that add comfort to life in line with emerging technologies by supporting the ability to respond to changing needs of its customers with the goal of “A Better Life, A Better World”.

welcome to the world of solutions

V:KO targets quality improved lives with more comfort and advanced technology in every solution provided. It meets the requirements of project and decoration with series having more human-oriented and rich options.

technologies that make life easier

Programmable Shutter Control

Shutter Control with digital display offers thief scenarios and daily and weekly programming options.

TV and Satellite Sockets

TV, satellite and radio socket options with low loss and high image quality meet the expectations with multiple combinations.

Multimedia Connector

Provides connection solutions for the needs of different audio, image transfer.

Multi-let Shock Protected Group Socket

Electronic devices are protected from the damages arising from sudden over voltages in the electricity grid thanks to Multi-let Shock Protected Group Socket.

IP44 Gasket Kit

IP44 gasket kit offer protection against moisture and dust for surface mount switches and sockets.

IP44 Switch Seal Set

IP44 Socket Seal Set with Lid

Analog and Programmable Digital Thermostat

Digital and analog thermostats with user friendly menu supporting 7 languages in addition to the adjustable backlight feature, allows high precision temperature adjustment with its special PI algorithm.

Data Sockets

Numeric (RJ11) and Data (Cat5, Cat6) socket options supported by two-gang combinations and internet connection.

Multi-let

Multi-let that can be fixed or hanged depending on the requirement is offered with its optional cable length and switching function.

PRO Dimmer Family

Pro Dimmer family that offers solutions in accordance with the illumination preference with its overload and short circuit protected product options, stands out with two-way and push on-off functions.

USB Charger Socket

Provides that the electronic instruments are charged quickly without the necessity of an additional apparatus in a safe way.

Surface Mount Solutions

Pacific and Palmiye with IP54 features offer surface mount solutions in outdoor use and Vera offers surface mount solutions in indoor use.

IP54

Motion Sensors

Motion sensors featuring 180° horizontal detection and timing option from 10 seconds to 20 minutes, combine the sense of safety with comfort thanks to their detection distance of 5 m.

Motion Sensor with Neutral

Motion Sensor without Neutral

Automatic Circuit Breakers

Automatic Circuit Breakers have a quite wide range of accessory series and satisfy users' every need, thanks to its fast mounting possibility due to the feature of screwless type connection.

Residual Current Relays

Residual Current Relays provide superior protection both for your loved ones and your places.

Distribution Boxes

VİKO distribution boxes deliver safety with plastic's insulative nature and an aesthetic view with their outstanding design.

hotel solutions

Reliability, quality, comfort and cutting-edge technology items play a key role in all energy saving hotel solutions.

Programmable Shutter Control

This product which is one of the solutions that will make the hotel guests feel privileged offers all features required for comfort and convenience.

Analog and Programmable Digital Thermostat

Thermostat options that ensure the hotel guests keep the temperature level in their rooms under control throughout their accommodation period, meet the expectations at maximum level.

Hotel Room Warning Unit

Hotel room units with language options are use friendly and ensure the comfort level required for the satisfaction of guests. DND / MUR systems protected against overheating and resistant against deformation are offered within decorative and elegant series that can be used in multiple framing when necessary.

Energy Saver

Sensor category products with easy mounting options that do not require any alterations fulfill all requirements thanks to their wide decorative options.

Energy Saver with Mechanical Switch (Weak Current)

- 5V DC operating voltage
- Operation with smart card
- Compatible with ESCU relay family
- Usage with Door / Window contacts and VRV air-conditioning systems
- Wide field of application compatible with all doors and hotel cards

RF Energy Saver

- 5V DC operating voltage
- Compatible with 13,56 MHz frequency cards.
- Operation with smart card
- Smart card recognition for authorized use
- Compatible with ESCU relay family
- Usage with Door / Window contacts and VRV air-conditioning systems

Energy Saver with Mechanical Switch (230V~)

- 230V~ operating voltage
- Operation with smart card or key chain
- Ease of cabling and mounting
- Safe usage with contactor
- Wide field of application compatible with all doors and hotel cards

ESCU

Card

Contactor

multimedia connectors and USB charger sockets

Offices, hotels and living spaces are re-organized according to the developing technologies... Connector options facilitate the lives for different connection versions regarding the needs of audio and image use.

USB Connector

No more looking for a USB input on devices...

- Solution for cable mess
- Practical data transfer
- Safe solutions for office and hotels

Connector for HDMI Connection

Connect to computer, television or projection device without cables causing visual pollution.

- Solution for cable mess
- Practical audio / image transfer
- Safe solutions for office and hotels

VGA Connector

You just need a VGA Connector for all of your VGA connections...

- Solution for cable mess
- Practical image transfer
- Safe solutions for offices and hotels

VGA (with PCB): Structure with terminal for easy assembly in narrow areas

With USB Charger Socket, unnecessary objects are removed. It provides the comfort of charging without adaptor in the hotel, home, office. Thanks to 2 socket outlets on USB Charger Socket, 2 separate devices can be charged at the same time.

USB Charger Socket

- 5V/2A output voltage
- Practical charging opportunity without adaptor
- Ease of charging on smart phones and tablets

dimmer solutions

Thanks to its technology and design, dimmer family offers prestige, comfort and convenience to living areas, business places and meeting rooms.

RLC Pro Dimmer

- 20W - 350W
- Compatibility with R, L and C load types
- Overcurrent protection
- Overload protection
- Smart dimmer function that recognizes the load type
- Push On / Off function

RC Pro Dimmer

- 40W - 400W
- Compatibility with R and C load types
- Overload protection
- Short circuit protection
- Two-way switch function
- Push On / Off function

RL Pro Dimmer

- 20W - 500W
- Compatibility with R and L load types
- Overload protection
- Short circuit protection
- Two-way switch function
- Push On / Off function

RL Pro Dimmer

- 6W - 100W
- Compatibility with R and L load types
- Overload protection
- Short circuit protection
- Two-way switch function
- Push On / Off function

1-10V Dimmer

- 1 - 10V
- Ability to dim fluorescent lamps by connecting to dimmable ballasts
- 230V: 6A

Overload Protection

When load exceeding the permitted value is connected the products with "Overload protection" function enable the protection mode and prevent the product break down or avoid any danger. When the load passing over the product returns to normal values, the product will restart as well.

interior details for comfort

Renewed mechanism

Renewed mechanism is designed for high-end security. The easy mounting feature offers a lot more than expected thanks to its structure and simplicity that covers wall incompatibilities.

New system without retainer

The assembly of the frame to the mechanism is easier with the tabs added to the base support and does not require a retainer.

Springiness mechanism structure

Thanks to the ability of the mechanism to spring inside the frame, wall incompatibilities are tolerated.

Tighter, hidden key tabs

Hidden tabs prevent pricking and similar incidents.

Unenergized frame

For extra security, the frame is prevented from being energized through the tabs during assembly.

Information

Together with cable connections and circuit diagram, it provides information and routing to prevent complexity.

Front phase control after assembly

For more security and convenience, it is possible to check phase from the front using a test light after the assembly.

Note: For Karre and Meridian series.

Hidden tab with spring

The hidden tab with spring prevents pricking and similar incidents.

Unenergized frame

For extra security, the frame is prevented from being energized through the tabs during assembly.

Safety

New mechanism has a cover that increases safety and cuts off contact with stressed areas.

D-shaped earthing contacts

Thanks to grounding contacts in D shape, it ensures the sustainability of the contact pressure applied to switch.

Note: For Karre and Meridian series.

special for angular line lovers

Linnera

Linnera shows up with distinctive corners. It displays its claim with a modern line on switches and sockets. Linnera is designed for the ones who give priority to angular lines in decorations.

Linnera

colors are elegant,
corners are very clear

White

Beige

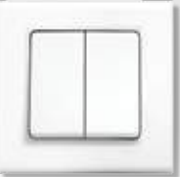

Linnera does not leave the ones in dilemma when deciding and draws the boundaries very clearly in the decorations. Offered in cream and white color options, Linnera calls out those who are looking for a modern and new form apart from the known. Offering the possibility of meeting all needs with the wide range of products, Linnera satisfies expectations at every point with its quality, technology and safe use.

Living spaces with dimmers offered in compliance with lighting requirements, TV and telephone sockets in Linnera series meet both comfort and energy saving.

moderate and consistent
in all aspects

rollina

With its elegant and round lines, Rollina reflects its moderate and consistent character into the daily life of its users. Designed to be simpler with its switch and socket products without compromising comfort or quality, Rollina invites you to get to know it more closely.

Rollina

classic colors,
stylishly designed products

White

Beige

Offering white and beige color options in its switch and socket products with its own special lines, Rollina accompanies furniture and other household accessories. It does not mislead those who prefer it in making dreams of designs come true. It offers suitable options according to the place of use with horizontal and vertical frames.

Rollina, including its dimmer switches in its wide range of products, brings comfort and convenience to its users' satisfaction.

an elegant touch

kardelen

Kardelen touches the environments where it is used like a light fairy with its sheer beauty. With Kardelen, the concepts of comfort, aesthetics and harmony are given the utmost priority in life.

design addressing to emotions,
colors in harmony with time

White

Beige

With a rich product range including TV and telephone sockets and multiple frame options, Kardelen is offered with 2 clips colors that can be combined with the main color options of white and beige.

In addition to electronic products, dimmer options, one-gang and two-gang socket options, child protected socket option enriches the product range of Kardelen.

minimal elegance

karre

Karre, a highly special series that comes into prominence... It fills a huge gap in the decoration or changes the whole view of living spaces with a delicate touch. With Karre series, design, technology and quality turn into happiness for everyone.

modern design and all time colors

White

Beige

Complementing the beauty of living spaces with a single touch, Karre makes elegance a part of life with its hard-edged minimalist design.

Karre switch and socket series with white and beige color options offer alternative solutions for different usage areas with its two-gang, three-gang, four-gang, five-gang, six-gang horizontal and vertical frames.

Karre with its sharp lines, modern form, simple but attractive stance redefines literal beauty with its white and cream color alternatives. Karre which is the key of chic places reflects its strong design everywhere with its wide product range including switches, sockets and thermostat options.

selective perception

Meridian interprets literal elegance in its own style. Meridian that adds value to life complements the decoration of places with its simple form. From now on, you are as close as Meridian to change.

indispensable style,
indispensable simplicity

White

Beige

The solutions are enlightened with design in the rich world of Meridian colored with white and beige. Meridian creates solutions almost at every point with its energy efficient options intended for safe use. It features alternatives for different and multiple uses with its two-gang, three-gang, four-gang, five-gang, six-gang, horizontal and vertical frames.

With its renewed and strengthened mechanism, Meridian offers safe and strong socket solutions and meets the necessities including internet and satellite sockets. Energy Saver, temperature control, blind opening and closing, comfort and energy saving come in to the prominence in Meridian without compromising design.

design that adds elegance to life

Carmen is designed with lines reflecting the life. It is attracting all attention with its design as warm as your home and lines as sleek as the time.

aesthetic integrity,
harmonious simplicity

White

Beige

Ensuring full harmony with your decoration preferences, Carmen series is offered with white and beige color options. Besides, Carmen also offers two-gang, three-gang five-gang horizontal and vertical frame applications.

The mechanism of Carmen series which is installed instantly and practically is only one of the privileges offered by this series. Carmen meets all requirements in switching completely with 23 different functions. In addition to safe use, single and two-gang socket functions Carmen also offers smart solutions for basic socket requirements with its child protected socket option.

Thanks to TV and telephone sockets and electronic products with easy installation included in Carmen series and dimmers provided in accordance with illumination requirements, living spaces meet with comfort and energy efficiency.

Vera

above the line comfort,
surface mount easiness

Creating surface mounted solutions for indoor places, Vera combines its design making life easier with safety of use. Vera surface mounted series meets comfort, design and functionality expectations with standards required for safety of use.

Vera

privileged colors in surface mounted design

White

Beige

Mahogany

Oak

Vera surface mounted series offering colorful and wooden patterned decorative solutions for indoor places, meets the expectations for functionality and comfort. Vera series with extensive product range and easy to install features offers above the line comfort with surface mounted switches and sockets for areas free from moisture.

Vera series meets TV / Data socket requirements with surface mounted products. Two-gang horizontal and vertical surface mounted combinations in compliance with requirements, decorations and architectural structure of places are also included in the product range of Vera series.

everyone desires to feel safe

Wet and moist areas, harsh conditions, dust or smoke... Pacific is ready for all. Pacific with IP54 feature is designed to be admired. Pacific IP54 fulfills its task perfectly for safety in bathrooms, SPA saloons, laundry rooms, workshops, terraces and balconies.

Pacific

strong protection against
water and dust, reliable design

White

Gray

Dark Gray

Strong and durable Pacific with IP54 function for outdoor areas underlines the concept of safety in surface mounted applications. Pacific highlighting its durability with dark gray, gray and white color options meets all expectations with its extensive product range. IP54 protected Pacific ensures prevention of unauthorized access with its locked lid alternative.

Users of Pacific may choose form vertical or horizontal combinations according to the places. With the label kit that could be purchased separately and installed for unlabeled products and duplicate injection vertical joint gasket, Pacific makes life easier.

inside-out Pacific IP54

IP54

Protection against dust and splashing water with IP54 function

Wide Internal Volume

Wide internal volume for easy wiring

Sealing

Safe use with duplicate injection gaskets offering sealing function

Cover

Fast and easy installation with quick connecting terminals

Thermoplastic Structure

Glass fiber reinforced thermoplastic material ensuring high impact strength, resistance to chemical and thermal environments

Installation on Wall from the Closest Point

Thanks to patented asymmetrical gasket system in Pacific, the cables can be installed from the closest point to the wall. Furthermore, it allows inlet of cable with three different dimensions.

Patented gasket system for cable installation from the closest point to the wall without twisting

Cables can be installed just by pressing and gasket system is appropriate for installing cables in three different sizes

Duplicate injection gaskets with sealing functions for vertical use

Special Earthing Connectors

Special earthing connectors for safe use are offered as standard in all Pacific products.

Safe use with quick earthing connector that ensures transition in switch group

Safe sockets with new design earthing contact

Innovative Rapid Screws

Thanks to innovative rapid screws, the upper body of the product can be installed in a quicker manner to the product base.

Compact Pair

Pacific offers horizontal and vertical product combinations.

privilege of
dusty and moist places

palmiye

Moist places enjoy the privilege of elegantly designed, long lasting Palmiye series with IP54 function. Palmiye series meet the expectations for safe use in areas requiring more care and caution. Products of Palmiye series come into prominence with long lasting and durability features and offer decorative choices with white and gray color options.

decorations that never become old fashioned and elegant designs

White

Gray

Thanks to IP54 function of Palmiye offered with white and gray color options, this series provide resistance to dust and moisture, long lasting capability, cover that could be assembled or disassembled only by tightening or loosening screw and flexible gasket that enables installing the cable by pressing and make difference with quick and safe cabling functions.

Surface mounted Palmiye series offers earthed and earthed UPS sockets with lid resistant to dust and water thanks to IP54 function. TV / Data socket options with surface mounted IP54 function and optional horizontal and vertical two-gang combinations depending on the application area enrich the options of users.

multiple functions in
group sockets

Multi-let with its special designed bracket offers safety and comfort at home, office, workshop and work-site thanks to its ability to be fixed or hanged. Thanks to different cable lengths, the cable disruption is avoided.

advanced design,
multi-functional use

- Fixed use in surface mounted applications
- Use by hanging when desired
- Child protection feature offered as standard in all products
- Special rear lid that could be opened for easy and safe cable installation*
- 2-gang, 3-gang, 4-gang, 5-gang and 6-gang product options
- Cordless (terminal) or 1 m, 2 m, 3 m and 5 m cable options
- Product option with and without switch
- On/Off Push button with orange light
- Black and white color option

* Rear lid can be opened in all products with switch or terminal.

Thanks to the special design holder bracket you can use Multi-let either by hanging or fixing in surface mounted applications.

Use by Hanging

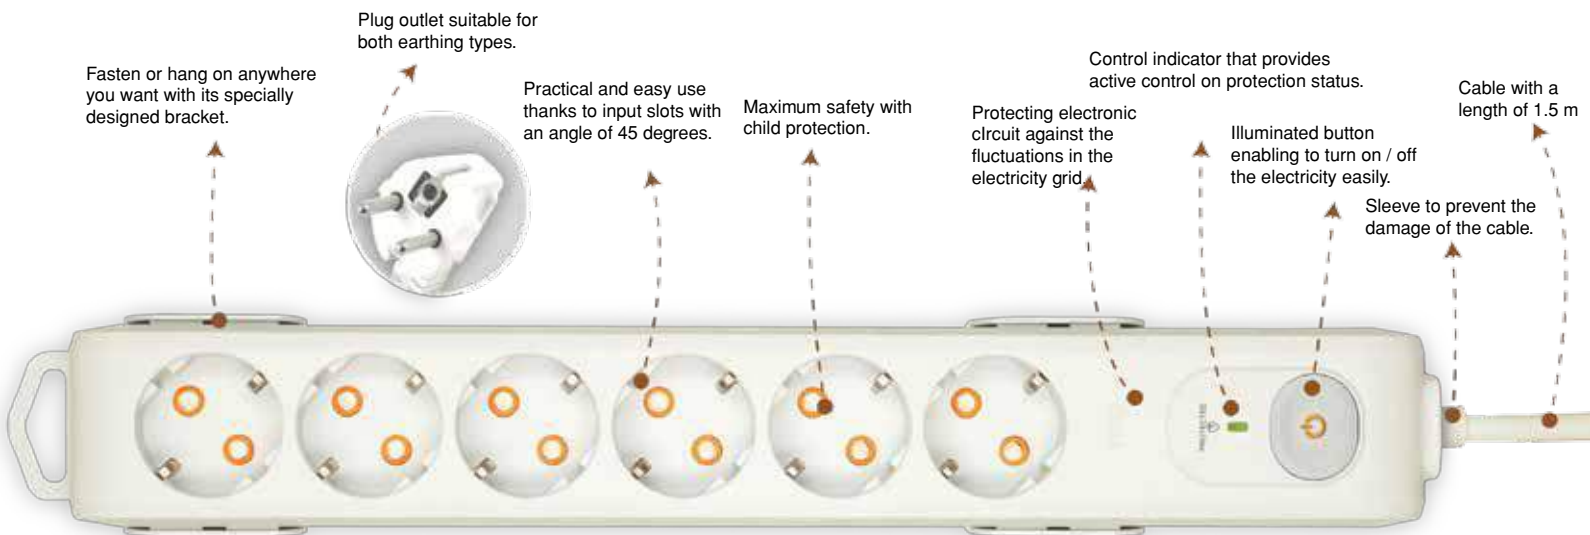

Install the guide pin on holder bracket to the appropriate place on the group socket. From now on, you may use Multi-let by hanging wherever you want.

Surface Mounted Use

Thanks to special holder bracket, you may use Multi-let by fixing it wherever you want. Firstly, install the holder bracket on to wall or another surface by using appropriate screws in screw holes. Fix the guide pin and its apparatus that ensure guiding on to the appropriate point on the group socket.

Don't let your joy be interrupted!

Sudden over voltages can't damage your electronic devices thanks to **Multi-let Surge-protected Group Socket**

Electronic devices may be damaged due to the sudden over voltages occurred in the electricity grid and your device may become out of use.

Multi-let Surge-protected Group Socket ensures that electronic devices like televisions, desktop computers and laptops, audio systems, printers, scanners are protected against sudden over voltages occurred in the electricity grid.

multilet
Surge-protected Group Socket

Multi-let Surge-protected Group Socket prevents damage to devices due to spikes in the grid.

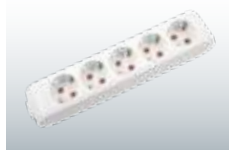

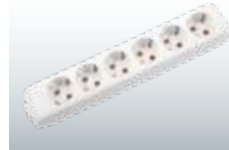

In case of spikes in the grid, Multi-let Surge-protected Group Socket absorbs such spikes with the built-in protection elements and prevents devices to be subjected to such spikes. Multi-let Surge-protected Group Socket cuts the outlet voltage and renders itself unoperational. Then, Multi-let Surge-protected Group Socket which loses its characteristics of surge-protection against any repeated grid problems, stops its operation as standard type group socket as it does not comply with its intended use. In such a case, the orange and green light on the product fades.

complementary products and
wide variety of solutions

Accessories category offers quick and practical solutions at home and office with 3 m to 5 m length and single safe intermediate / extension options depending on the area of application. Various plug alternatives included in the product range offer options that make life easier for users. In addition to flush mount and plug and go products for one-stop 3-gang socket solution, flush mount boxes and junction boxes with Halogen free option on hollow-wall and concrete wall systems meet requirements in full.

Dimmers

Rotary Dimmer RL 1000W

Technical Specifications

- RL Dimmer
- Maximum Output: 1000W (R Type Load), 800VA (L Type Load)
- Minimum Output: 60W (R Type Load), 100VA (L Type Load)

Function Table

Load Type	Compatible Loads	Dim
R Type Load 	Incandescent and Halogen Lamps 230V	Triggering from Start
L Type Load 	Halogen Lamps with Mechanical Transformer / Halogen Lamps with Low Voltage	

Circuit Diagram

Pro Dimmer RL 6-100W

- RL Dimmer
- Maximum Output: 100W (R Type Load), 100VA (L Type Load)
- Minimum Output: 6W
- Feature to use as two-way switch
- Feature to switch on/off at the set level of dimming

Load Type	Compatible Loads	Dim
R Type Load 	Incandescent and Halogen Lamps 230V	Triggering from Start
L Type Load 	Halogen Lamps with Mechanical Transformer / Halogen Lamps with Low Voltage	
LED 	Dimmable LED Lamp	

Pro Dimmer RL 20-500W

- RL Dimmer
- Maximum Output: 500W (R Type Load), 500VA (L Type Load)
- Minimum Output: 20W
- Feature to use as two-way switch
- Feature to switch on/off at the set level of dimming

Load Type	Compatible Loads	Dim
R Type Load 	Incandescent and Halogen Lamps 230V	Triggering from Start
L Type Load 	Halogen Lamps with Mechanical Transformer / Halogen Lamps with Low Voltage	

Pro Dimmer RC 40-400W/VA

- RC Dimmer
- Maximum Output: 400W (R Type Load), 400VA (C Type Load)
- Minimum Output: 40W
- Feature to use as two-way switch
- Feature to switch on/off at the set level of dimming

Load Type	Compatible Loads	Dim
R Type Load 	Incandescent and Halogen Lamps 230V	Triggering From End
C Type Load 	Halogen Lamps with Electronic Transformer / Halogen Lamps with Low Voltage	

Pro Dimmer RLC 20-350W/VA

- RLC Dimmer
- Maximum Output: 350W (R Type Load), 350VA (L Type Load), 350VA (C Type Load)
- Minimum Output: 20W
- Feature to use as two-way switch
- Feature to switch on/off at the set level of dimming

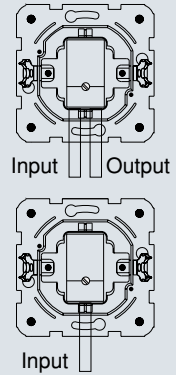

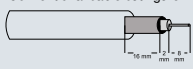

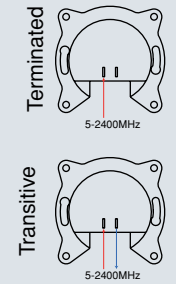

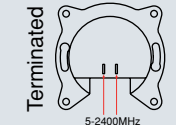

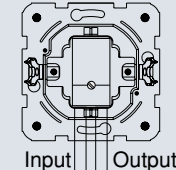

Load Type	Compatible Loads	Dim
R Type Load 	Incandescent and Halogen Lamps 230V	Triggering from Start and End
L Type Load 	Halogen Lamps with Mechanical Transformer / Halogen Lamps with Low Voltage	
C Type Load 	Halogen Lamps with Electronic Transformer / Halogen Lamps with Low Voltage	

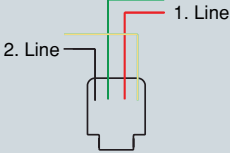

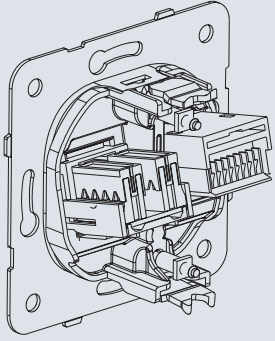

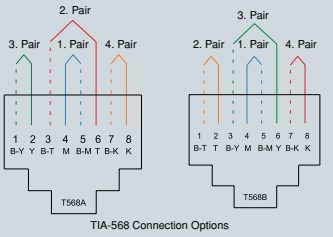

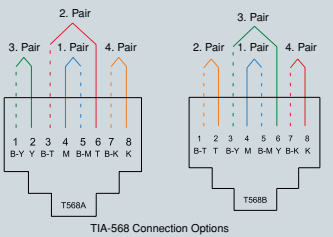

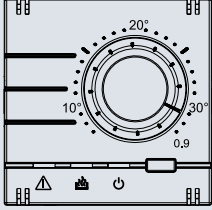

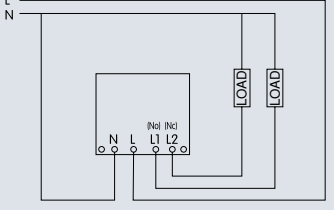

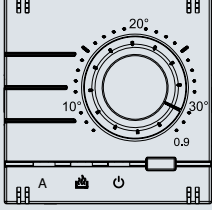

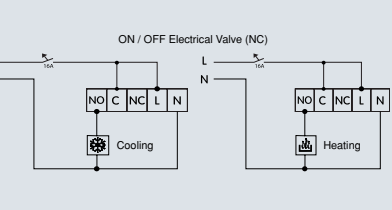

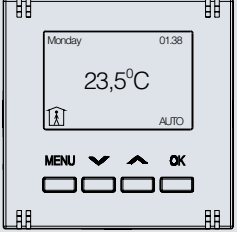

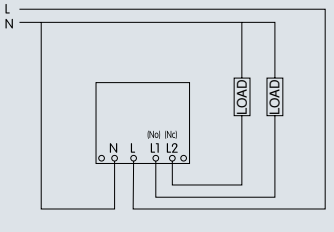

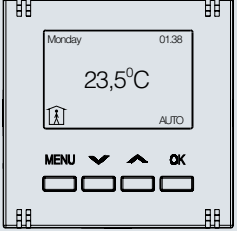

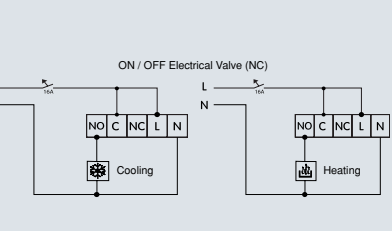

1-10V Dimmer

- 1-10V
- Dimmable ballast
- Feature to switch on/off at the set level of dimming

Through-pass Used for broadcast distribution to multiple TV receivers where broadcast is received from UHF/VHF bands to the center via an antenna system and then distributed via inter-socket or inter-floor - in multi-storey buildings- transition. Terminated Used in star-connected systems for Internet, cable TV or central satellite broadcasts. May also be used at the end of the shared antenna systems. The sockets to be mounted after the amplifier must be (10dB transitive and terminated options to be compatible with 60-85 dBuV TV signal levels. 	<table border="1"> <thead> <tr> <th colspan="11">SAT (Terminated)</th> </tr> <tr> <th>Frequency range (f/MHz)</th> <th>5 MHz</th> <th>860 MHz</th> <th>950 MHz</th> <th>1000 MHz</th> <th>1,2 GHz</th> <th>1,6 GHz</th> <th>2,0 GHz</th> <th>2,25 GHz</th> <th>2,4 GHz</th> <th></th> </tr> </thead> <tbody> <tr> <td>SAT IN-OUT (dB)</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> <td>≤ 3,5</td> </tr> </tbody> </table>	SAT (Terminated)											Frequency range (f/MHz)	5 MHz	860 MHz	950 MHz	1000 MHz	1,2 GHz	1,6 GHz	2,0 GHz	2,25 GHz	2,4 GHz		SAT IN-OUT (dB)	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	≤ 3,5	 <p>Input Output</p>

Technical Specifications

Programmable Shutter Control

Maximum output current	NC: 5(2)A 230V AC
Operating voltage	230V AC $\pm 10\%$, 50Hz
Power reserve	25°C 6 hours
Memory	4 different program setting per a day
Operating temperature	0°C - 30°C
Protection	IP20
Standard	EN 60669-2-1

Motion Detector

With Neutral (3 Wire)

Detection angle	180°C Horizontal
Detection distance	8 m max
Time adjustment	10 sec-20 min
Supply voltage	220V AC-240V AC 50Hz
Operating temperature	0°C - 35°C
Installation height	1 m-2 m
Load types	Lamps with glow filament: 2300W
	For halogen lamps using mechanical transformer: 1500VA
	For halogen lamps using electronic transformer: 1500VA
	For dimmable CFL lamps: 1500VA
Daylight adjustment	5 - 250 Lux
Inrush Current	Maximum 20ms (for lamps with glow filament) 80A

Figure 1
Connection for Normal Operation

Figure 2
Connection for Operation with Push Button

Figure 3
Connection for Master / Slave Operation

Without Neutral (2 Wire)

Detection angle	180°C Horizontal
Detection distance	8 m max
Time adjustment	10 sec-10 min
Supply voltage	220V AC-240V AC 50Hz
Operating temperature	0°C - 35°C
Installation height	1 m-2 m
Load types	50W/VA-300W/VA
	Not used with LED, Fluorescent and CFL Lamps
Daylight adjustment	5 - 250 Lux

Energy Saver

Technical Specifications

Delayed Switch Energy Saver 230V AC~

Operating voltage	230V AC±10%, 50Hz
Operating temperature	0°C...45°C
Maximum switching current	0,15A
Connection wire	Minimum 0,50mm ² diameter
Opening time	Max. 1 sec.
Closing delay	25...30 sec.
Standard compliance	EN 60669-2-1

Mechanical Switch Energy Saver 5V DC-

Operating voltage	5V DC-
Operating temperature	0°C...45°C
Maximum switching current	0,03A...0,2A
Connection wire	Minimum 0,50mm ² diameter
Card sensing method	Mechanical

13,56 MHz RFID Energy Saver Multi Protocol (MP) and Single Protocol (SP)

Operating voltage	5V DC-
Operating temperature	0°C...45°C
Maximum switching current	0,03A...0,2A
Connection wire	Minimum 0,50mm ² diameter
Card sensing method	RFID
RFID 13,56 MHz MP	ISO/IEC 13332 A/B, ISO 15693, ISO 18000-3, Tah-it™
RFID 13,56 MHz SP	ISO/IEC 14443A

ESCU Relay

Operating voltage	230V AC~ 50Hz
Operating temperature	0°C - 45°C
Maximum switching current	16A
By-Pass Option	Yes
Magnetic Contact Connection	Yes
Standard compliance	EN 60669-2-1

Standard Energy Saver - Delayed

Operating voltage	230V AC~ 50Hz
Operating temperature	0°C -45°C
Maximum switching current	0,5A
Connection wire	Minimum 0,50mm ² diameter
Opening time	Maksimum 1 sec.
Closing delay	25...30 sec.
Standard compliance	EN 60669-2-1

Standard Energy Saver - Relay

Operating voltage	230V AC~ 50Hz
Operating temperature	-40°C - 70°C
Maximum switching current	10A
Coil Resistance	19,465 kOhms

CARD READER TYPES

WARNING 230V lower assembly and 5V upper assembly should never be used together.

Technical Specifications

Volume Control Switch

- 12 level volume control
- 3-1200Ω adjustable impedance range
- Appropriate for 8Ω audio systems
- Appropriate of all types of wall mount boxes

Volume Control Switch with Transformer

- 11-grade sound adjustment
- 2VA transformer
- Suitable for systems with line transformer
- 4x100W speakers with line transformer
- Suitable for deep cases
- Built-in relay unit for 100V sound systems and emergency announcements.

Low Voltage Switchgear Products

high trust in low voltage

Miniature Circuit Breaker

Automate your safety...

- Body structure designed according to high disconnecting capacity
- Energy saving with low power consumption
- Class IP20 connection terminals with high protection against manual contact
- 12-plate cell to attenuate the active arc formed
- AgC4 contact structure for long life
- Accessories options for your need

Miniature circuit breakers provide superior protection with their thermal-magnetic tripping feature.

Thermal Protection

Provides protection by switching off in case of overload. Activates the thermocouple mechanism which tilts due to high temperature and make main contacts disconnect from each other.

Magnetic Protection

At high currents or in case of short-circuit, piston inside the coil switches off by triggering the mechanism with magnetic changes and provides protection.

Miniature Circuit Breaker

Advantages

Compatibility with DIN Rails and Screw Assembly

Product can be installed on any desired surface, even in the absence of a DIN rail.

All Types of Busbar Connections

Provides an installation safer than wiring and an aesthetical, fast connection

Protected Terminals

Ensures that the wire is fully inserted into terminal through protected terminals. At the same time, it does not allow a faulty wire connection and prevents arc formation during installation.

Labeling System

By looking on top of the fuse, it is easy to understand in which line a problem is, finding the fault becomes more convenient.

Annunciators

Annunciator on the circuit breaker makes the switch position visible. This feature minimizes the malfunction time and enables safe intervention to the assembly.

■ OFF position

■ ON position

Insulation Wall

At multiple connections, it does not allow circuit breakers to contact each other, eliminates the potential arc and short-circuit risk, protects the assembly.

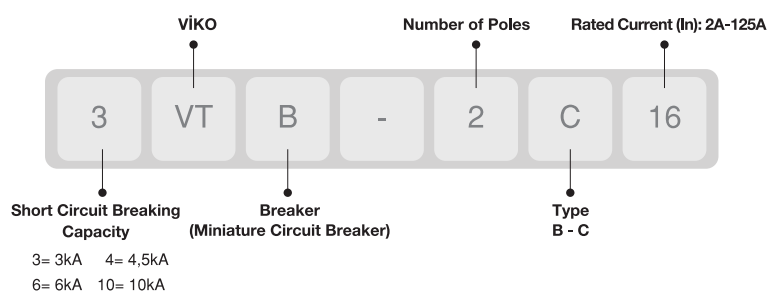

Compatibility with Accessories

With compatibility of the auxiliary accessory assembly spot, it offers the option to use with accessories.

Connection Diagram

Accessories

VIKO miniature circuit breaker have accessories options for your need of accessory series and satisfy users' every need, thanks to its fast mounting possibility due to the feature of screwless type connection.

6 VTB - 10 VTB Series Miniature Circuit Breaker Accessories

Description		Ref. No
Auxiliary Contact Block 2 - 63A	1NO + 1NC	VTBK-AU2/11
Overtoltage Coil	230V AC	VTBK-OVR2

VTBK-AU2/11 - Auxiliary Contact Block

Mechanical Life	10000
Operating Temperature	-25°C~+50°C
Storage Temperature	-40°C~+85°C
Mounting	DIN Rail EN 60715 (35 mm)

Deactivate residual current
before it causes damage...

- Simple and solid operating mechanism
- Connection terminals suitable for cable, pin and bifurcated busbar entry
- Monthly test button for regular controls
- Superior protection against electric shocks and fire
- Class IP20 connection terminals with high protection against manual contact
- Design compatible with VIKO circuit breakers

Residual Current Circuit Breakers provide superior protection both for your loved ones and your places.

30mA is aimed for protecting human life, it must be connected to the secondary distribution boxes and sockets at the entrance of houses and workplaces.

300mA is for fire protection, 300mA residual current circuit breakers should be used in main distribution boxes.

Residual Current Circuit Breaker

Technical Information

Mounting Type	DIN EN 50 022 - 35 mm				

WARNING!

Residual Current Circuit Breaker are products used compulsorily in order to protect people against direct or indirect contact, and devices against insulation faults and fire hazard. Delivers the function of protecting life at 30mA (Human Protection) and Installation at 300mA (Fire Protection). Residual Current Relays provide superior protection both for your loved ones and your places. Residual Current Relays must be used as complementary to the system, along with grounding system and circuit breakers.

Modular Products

Full protection, full trust at
all times and places...

- Simple and solid operating mechanisms
- Mounting suitable for DIN rail
- Compatible with panel applications

Modular Products

Low Voltage Surge Protectors

VIKO Low Voltage Surge Protectors enables protection of power lines from potential direct or indirect electromagnetic effects of lightning. They attenuate suddenly formed overcurrents by transmitting them to the ground. Provides full protection and safety in your installation, in order to hold electronic and electrical devices harmless.

- Simple and solid operating mechanism
- Protection of electric / electronic devices against lightning impulses, in industrial and commercial building
- Maximum Discharge Current (I_{max}) : 100kA - 50kA - 40kA - 20kA
- Effective lightning protection in all classes (B, B+C, C, D Types)

Analog Timers

VIKO timers are time relays which control lighting systems at intervals of choice, without need for sensors such as photocell and it is also used in applications involving agricultural activities such as garden irrigation. They enable lighting control at determined time intervals and save energy by preventing energy loss to be formed in unnecessary time intervals thanks to lighting control.

Technical Specifications

- **Feeding:** 230V AC \pm %10 50Hz
- **Load capacity:** 16(4)A/250V
- **Power consumption:** 0.5W
- **Timer accuracy:** \pm 3 sec/day 22°C
- **Battery life:** Daily model: 150 hours
- **Dial type:** Daily: 96 pins
- **Minimum switching time:** Daily: 15 minutes
- **Operating temperature:** -10C - +50 °C
- **Protection against electric shocks:** "Class II"
- **Protection class:** IP20
- Manually controllable, 2-position selector

🕒 = Automatic

I = On (Contact no. 1 & 2 are always off)

- Mounting to 1 DIN rail

Rail Type Contactors

VIKO rail contactors are used in order to check electric circuit, trip and close the circuit or enable flow through automation circuit, in places such as hotel rooms, residences, hospitals. Rail Type Contactors are also known as silent contactors.

Earth Leakage Relay

Accuracy adjustment at VELR-30 series residual current detection relays ($I\Delta n$);

- Accuracy selection at 9 different settings; 30mA, 50mA, 75mA, 100mA, 125mA, 150mA, 200mA, 250mA, 300mA.
- Multiplier adjustment at 3 different positions; 1*, 10*, 100*.
- Time adjustment for fault detection; Sudden (without delay), 50ms, 100ms, 250ms, 350ms, 500ms, 1s, 2s, 5s.

Current Threshold	Supply Voltage	Trip Time Adjustment	Reference Number
30mA - 30A	10V/220V A	0.05 sn - 5 sn	VELR - 30

Toroidal Current Transformer

Toroidal current transformer calculates the current difference between the current inflows and outflows. It detects possible leakage current in the system together with the leakage current detection relay.

Moulded Case Circuit Breaker

Residual Current Type SN2 Series

VMR series MCCBs provide thermal-magnetic as well as residual current protection at high current breaking capacities in the range of 50A to 500A rated current values. With its residual current adjustment feature offered in addition to fixed type switch, offers accuracy adjustment for residual currents at the residual current breaking values of 100, 300, 500mA. Provides full solution in installation thanks to its residual current protection feature in addition to thermal-magnetic protection. Adjustments on your device are carried out via switches located under your device.

Residual Current Combinations

VIKO provides the option to establish a residual current set with MCCB up to 400A. Toroidal Current Transformer, shunt trip coil and earth leakage relay must be a part of the structure to be established. Therefore, this installation will establish a compact switch with thermally adjusted residual current protection up to 400 amperes. In order to create a Residual Current combination;

- MCCB
- VELR Series Earth Leakage Relay
- VTTR series Toroidal Current Transformer
- Shunt Trip Coil compatible with compact switch must be ordered all at once.

Connection Diagram

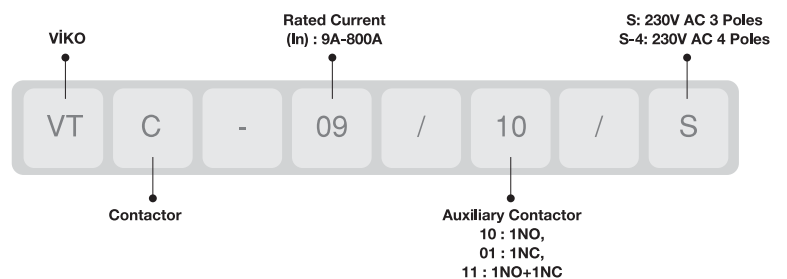

power is under control...

- From 9A to 800A
- In conformity with the EN 60947-4-1 standard
- Easy and safe installation
- Variety of options for accessories
- AC coil voltages 400V
- Maximum safety in installations when used together with VIKO branded compact switches and thermal relays

Rated Condenser Power	200/240V	kVAr	6,7	8,5	10,0	15,0	20,0	40,0
	400/440V	kVAr	12	16	20,0	25,0	33	60,0
Thermal Current (Ith)		A	32	40	50	60	80	125
Rated Service Current (Ie) AC-6b	400V	A	18	25	32	40	50	95
Contact			1NO+1NC	1NO+1NC	1NO+1NC	1NO+2NC	1NO+2NC	1NO+2NC
Rated Insulation Voltage (Ui)		V	690					
Coil	Control Voltage (Us)	V	AC(50/60Hz) :24V,48V,110V, 220V,380V			AC(50/60Hz) :24V,48V,110V, 220V,380V		
	Tripping Voltage	V	85%Us-110%Us			85%Us-110%Us		
	Tensile Voltage	V	30%Us-55%Us			30%Us-60%Us		

Note: Voltage fluctuations cause an increase in condensers' rated current flow (In) by 1.3 times. Depending on the production tolerance -5%~+10%, condenser power can reach up to 1.1 times of the nominal power $1.3 \times 1.1 \times I_n = 1.43 I_n$. Please be careful while ordering.

Dimensions (mm)

Model	a	b	c
VCC-12	46	66,3	121,5
VCC-20	56	77	135,5
VCC-25	75	75	150
VCC-40	75	95	150
VCC-60	84,5	101,8	157

Connection Diagram and Auxiliary Contact Information

With Auxiliary Contact (3 Poles)

VTC-0910 ~ 3810

VTC 0901 ~ 3801

VTC-4011 ~ 9511

Without Auxiliary Contact (4 Poles)

VTC4-9, 12, 25

VTC4-40 ~ 95

Superior protection...

VRM Series Mechanical Thermal Relay

- Adjustment range from 0.4A to 93A
- Manual reset option
- Test button, stop button for emergencies
- Easy mounting to and aesthetical harmony with contactors

Thermal Relays

Mechanical Thermal Relay

In case of overload, they are used to prevent damage to engine. They are used with fuses or contactors. When the fuses provide protection at a certain current value, the thermal relays provide protection in the adjustable current interval.

Type	Electromagnetic		
Model	VRM-32A10~ VRM-32A23	VRM-32A24~ VRM-32A25	VRM-95A31~ VRM-95A37
Current Adjustment Range	0.25 ~ 25A	23 ~ 40A	23 ~ 93A
Standard	IEC EN 60947-4-1		
Pole	3P		
Frequency	50 / 60Hz		
Rated Service Voltage (Ue)	380V AC		
Rated Insulation Voltage (Ui)	750V		
Rated Voltage of Impact Resistance (Uimp)	6kV		
Category of Use	AC3		
Operating Temperature	-5°C ~ +40°C		
Auxiliary Contact	1NO-1NC		
Auxiliary Contact Rated Thermal Current (Ith)	5A		
Protection Class	IP20

Motor Protection Switches

maximum protection,
maximum performance...

VMP2 Series

- Overload and short-circuit protection
- Thermal Adjustment field between 0.25-32A
- Sensitive protection against phase loss
- Easy and safe mounting to 35 mm DIN rail
- Great variety of easily mountable accessories
- Protection of electric motors up to 15kW (380/400V)
- High disconnecting capacity 25kA ~ 100 kA (400V/AC)
- ★ Fast connection

Motor Protection Switches

VMP2 Series

Teknik Bilgiler	
Model	VMP2
Protection	Thermal - Magnetic
Standard	TS EN 60947-4-1
Thermal Adjustment Field	0.1-0.16; 0.16-0.25; 0.25-0.40; 0.4-0.63; 0.63-1; 1-1.6; 1.6-2.5; 2.5-4; 4-6.3; 6.3-10; 9-14; 13-18; 17-23; 20-27; 25-32
Rated Service Voltage (Ue)	690 V / AC
Thermal Tripping Current	1.05 I _r < I < 1.2 I _r I _r : Adjustable Current Value
Range in case of Overcurrent (I)	
Magnetic Tripping & Closing	11 I _n < I < 13 I _n ±%20 I _n : Maximum Value of Thermal Adjustment Field
Phase Loss Sensitivity	In conformity with IEC 60947-4-1
Mechanical Endurance	Switchable 100,000 times
Electrical Endurance	Switchable 100,000 times
Operating Temperature	-5 ~ +40 °C
Storage Temperature	-25 ~ +70 °C
Protection Class	IP20
Degree of Contamination	III / 3
Vibration Resistance (as per IEC 68-2-6)	5g (5 to 150 Hz)
Rated Insulation Voltage (Ui)	690 V
Impact Resistance Voltage (Uimp)	6kV
Trip Position (according to IEC/EN 60947-4-1)	10
Connection Section	Hard drawn conductor 0.75...10 mm ² - Flexible conductor 0.75...6 mm ²
Category of Use (according to IEC/EN 60947-4-1)	AC - 3
Category of Use (according to IEC/EN 60947-2)	A
Power Consumption (P)	2 - 2.5 W

Distribution Boxes

user friendly design...

Safety and design have met within VIKO distribution boxes. Sensitive safety thanks to plastic's insulative nature and decorative appearance due to aesthetical lines are together within the VIKO breaker boxes and in life. On the other hand, resisting against heat and impacts thanks to its strong structure, these breaker boxes also meet work comfort expectations in the best possible way with their large inner volume.

Distribution Boxes

VIKO breaker boxes deliver safety with plastic's insulative nature and an aesthetic view with their outstanding design. Meets your expectations thanks to its heat-and-impact-resistant structure and large inner volume which offers a comfortable work.

- Conform to IP40 protection standard.
- Class II; electric shock-protected.
- Temperature range during installation $-15^{\circ}\text{C} / + 60^{\circ}\text{C}$.
- Flame and fire-resistant up to 650°C .
- Has 180° screw-in covers depending on the place of use.
- Breaker rail is made of galvanized sheet.
- Provides comfort in mounting and working, thanks to its large inner volume.
- Resistant against heat and impacts.
- Grounding terminal and connection accessories are available.
- Halogen-free option.
- Water gauge.
